

## ZÁZEMÍ A VÝBĚH GIBONŮ

Zoologická zahrada  
Ústí nad Labem

Zoologická zahrada Ústí nad Labem, p.o.

JinJan s.r.o.

This architectural cross-section illustrates the vertical assembly of a building facade. The structure is divided into several vertical zones, each identified by a label at the top: F.3, F.1, F.2, F.3, F.5, F.4, F.3, and FR.3. The facade consists of a central section with vertical cladding, a section with a grid pattern, and a section with a brick pattern. Key features include a small dome-like structure on the roof, a window opening, and a door opening. Elevation markers are provided on both sides of the section, indicating heights in meters. On the left, the ground level is marked as ±0,000, and the roof level is marked as +2,500. On the right, the ground level is marked as ±0,000, and the roof level is marked as +4,000. The section also shows the internal structure, including the roof and floor slabs, and the existing ground level (stávající terén) is indicated by a dashed line.

Figure 1 consists of five sub-diagrams labeled F.1 through F.5, each showing a circle divided into four sectors by three radial lines. The angles of the sectors are labeled in degrees. F.1 shows sectors of 180, 120, 120, and 60 degrees. F.2 shows sectors of 180, 120, 60, and 120 degrees. F.3 shows sectors of 120, 60, 180, and 120 degrees. F.4 shows sectors of 60, 180, 120, and 120 degrees. F.5 shows sectors of 60, 120, 120, and 180 degrees.
